The Original Stopper®

ABOUT STI

It all started with a solution to a challenge

Who We Are

Family owned and operated for over 35 years, we take great pride in STI's products and exemplary service. Our entire team works just as hard to make you a satisfied customer as we do to make the world a safer place, one product at a time.

What We Do

STI manufactures protective polycarbonate covers, enclosures, push buttons, heavy-duty cages and wireless alarms to help prevent theft and vandalism to important fire and safety devices. Covers and cages protect: detectors, lights, manual call points, and much more. Alarms protect: fire extinguishers, exit doors, etc. Many options and variations of products are available to protect the things that protect you.

Where We Came From

The STI story begins three decades ago with a challenge made by a suburban Detroit school administrator who wanted to stop false fire alarms. Our Founder, Jack Taylor, used his expertise in security systems to invent the original Stopper® pull station protector. Today, STI has hundreds of innovative products that help make homes, businesses and workplaces around the world safe, smart and secure.

minor

False Alarm Issue?

severe

UV-stabilised polycarbonate Call Point covers protect a wide range of call points and electrical switches, without restricting legitimate operation. Ideal for shopping centres, hotels, schools, colleges, hospitals, nursing homes and all public buildings where there is a risk of accidental activation. All covers are available in a variety of colours for various applications.

Three year guarantee against breakage of polycarbonate in normal use (one year on electro-mechanical and electronic components).

Refer to Page 16 for dimensions.

FIRE & SAFETY

Call Point Protectors

DESIGN

Protective cover with optional integral sounder, prevents false fire alarms, without hindering legitimate operation of a manual call point in the event of an emergency.

INSTALLATION

Quick and easy to install and protecting in minutes. A simple 4 fixing installation can retrofit over existing device. Can accommodate flush or surface mount applications.

ELECTRONICS

Available with or without a 96 dB integral sounder, powered by a battery. The sounder draws immediate attention to the area.

CONSTRUCTION

Tough, clear UV-stabilised polycarbonate housing can withstand the severest of knocks preventing any vandalism or accidental damage to the manual call point or emergency button.

Euro Stopper Multi Kit allows assembly of a Fire or Access Control model. Only one cover is supplied. See website for further information

1. Universal Stopper®

Protective cover protects call points and switches without hindering legitimate operation. Suitable for indoor/outdoor use.

STI-13010FR - Flush
STI-13020FR - Flush/Sounder
STI-13110FR - Surface
STI-13120FR - Surface/Sounder

4. Stopper II®

Larger cover prevents malicious or accidental damage to large industrial call points and electrical switches. Model has a wire suspended mechanism.

STI-1100 - Flush/Sounder
STI-1130 - Surface/Sounder
STI-1200 - Flush
STI-1230 - Surface

2. Euro Stopper® Multi Kit

Protective cover prevents false fire alarms or access control MCP misuse. Supplied in kit form with glow in the dark frame. Red and green housing shells provided.

STI-15010ML - Flush
STI-15020ML - Flush/Sounder
STI-15C10ML - Surface
STI-15C20ML - Surface/Sounder

5. Weather Stopper II®

Larger weatherproof cover protects industrial MCP's and larger switches against the ingress of dust or water. Model has a wired suspended mechanism.

STI-1250 - Flush
STI-3150 - Surface

3. Call Point Stopper®

Protective cover prevents misuse and accidental damage to a wide range of electrical switches and call points.

STI-6930 - Flush
STI-6931 - Surface

6. Enviro Stopper®

IP rated (up to IP66 certified) protective enclosure ideal for extending life and reliability of devices in harsh environments.

STI-13610FR - Sealed Mounting Plate
STI-13620FR - Sealed Mounting Plate/Sounder
STI-13710FR - Open Mounting Plate
STI-13720FR - Open Mounting Plate/Sounder

The Euro Stopper is a protective cover which helps prevent malicious or accidental activation of call points and emergency switches. The Euro Stopper consists of a clear, tamper-proof, tough UV-stabilised polycarbonate cover and frame that retrofits over the device. Ideal for schools, hospitals and all public buildings where there is a history or threat of false activation.

All Euro Stoppers come as standard with a glow in the dark frame.

Three year guarantee against breakage of polycarbonate in normal use (one year on electro-mechanical and electronic components).

Refer to Page 16 for dimensions.

FIRE & SAFETY

Euro Stopper®

For Euro Stopper Multi Kit, standard fire & access control models, refer to Page 7

DESIGN

Protective cover with optional integral sounder. Prevents false alarms without hindering legitimate operation of the call point or emergency switch. Optional breakseal provides further security.

INSTALLATION

Quick and easy to install and protecting in minutes. A simple 4 fixing installation can retrofit over existing device. Can accommodate flush or surface mount applications.

ELECTRONICS

Available with or without a 96 dB integral sounder, powered by a 3V lithium battery. The sounder draws immediate attention to the area.

CONSTRUCTION

Tough UV-stabilised polycarbonate housing can withstand the severest of knocks preventing any vandalism or accidental damage.

The Universal Stopper and IP Rated Enviro Stopper are protective covers which help prevent malicious or accidental activations to vulnerable call points or switches. They are designed to protect devices such as call points and emergency buttons from the elements and ingress, making them suitable for indoor/outdoor use. Both models are ideal for schools, hospitals, factories and all public buildings where there is a history or threat of false activation.

Three year guarantee against breakage of polycarbonate in normal use (one year on electro-mechanical and electronic components).

Refer to Page 16 for dimensions.

FIRE & SAFETY

Universal Stopper® & Enviro Stopper®

DESIGN

Protective covers with or without integral sounder designed to prevent false alarms without hindering legitimate operation of a manual call point or emergency button. The Universal Stopper is retrofittable, and the Enviro Stopper is an IP Rated enclosure.

INSTALLATION

Quick and easy to install and protecting in minutes. With a simple 4 fixing installation, the Universal Stopper with an open spacer can retrofit over existing devices and can accommodate flush or surface mount applications. Enviro Stopper has a closed back box to maintain IP integrity.

ELECTRONICS

Available with or without a 96 dB integral sounder, powered by a 9V PP3 battery. The sounder draws immediate attention to the area. Optional 12-24 VDC powered units available.

CONSTRUCTION

Tough, clear UV-stabilised polycarbonate housing can withstand the severest of knocks preventing any vandalism or accidental damage.

The Exit Stopper is a unique and highly effective way to alert you to any unauthorised exits or entries through emergency exit doors. If the protected door is opened, the electronic Exit Stopper emits a powerful 95/105 dB warning alarm and visual flashing beacon. Available in red or green.

Three year guarantee against breakage of polycarbonate in normal use (one year on electro-mechanical and electronic components).

Refer to Page 16 for dimensions.

FIRE & SAFETY

Door Alarms

NEW PRODUCT FEATURES!

DESIGN

Unique and highly effective way to alert you to any unauthorised exits or entries through emergency exit doors. It can also serve as an inexpensive security device and help prevent theft. Comes with optional Multi Lingual Warning Instruction Label sheet.

INSTALLATION

Highly versatile, can be mounted or installed on to any type of door, including remote placement of sounder.

ELECTRONICS

The new beacon feature, provides a visual indication when the unit is 'on' and flashes when activated. It works alongside the 98 dB warning alarm, powered by a 9V PP3 battery. The unit is fitted with a low battery warning. There are a number of user programmable features to suit applications needs. 12-24 connection or wireless option is available.

CONSTRUCTION

Virtually indestructible UV-stabilised polycarbonate housing.

AVAILABLE 2018

1. Exit Stopper®

Highly effective door alarm alerts to unauthorised use of exit doors.
STI-6400 - For single door installation
STI-6402 - For double door installation
STI-6400-G - For single door installation in Green

2. Wireless Exit Stopper® with Receiver

Wireless supervision for up to 8 exit doors. Includes a STI 8-Channel Receiver.
STI-6400WIR8

3. Wireless Exit Stopper® with Voice Receiver

Wireless supervision for up to 4 exit doors. Includes a STI 4-Channel Voice Receiver.
STI-V6400WIR4

4. Wireless Exit Stopper®

Wireless alarm unit to monitor the use of emergency exit doors. Requires an STI Receiver to alert to misuse.
STI-6400WIR

The Extinguisher Stopper has proven highly effective in helping prevent theft, misuse and vandalism of fire extinguishers. The Extinguisher Stopper will leave the extinguisher accessible for emergencies and will not interfere in the event of a real fire.

Three year guarantee against breakage of polycarbonate in normal use (one year on electro-mechanical and electronic components).

Refer to Page 16 for dimensions.

FIRE & SAFETY

Extinguisher Alarms

DESIGN

Compact design mounts easily next to the extinguisher.

ELECTRONICS

Sounds a powerful 95/105 dB (at 1 metre) warning alarm when activated. Powered by a 9V PP3 battery. 12-24 or wireless option is available.

INSTALLATION

The device is easy to install and a deactivation cable is supplied for ease of servicing the extinguisher. Operating cable kit is supplied allowing the connection around the neck of the extinguisher.

CONSTRUCTION

Virtually indestructible UV-stabilised polycarbonate housing.

1. Extinguisher Stopper®

Alarm unit to help prevent theft, vandalism or misuse of fire extinguishers.
STI-6200

2. Wireless Extinguisher Stopper® with Receiver

Wireless supervision for up to 8 fire extinguishers. Includes a STI 8-Channel Receiver.
STI-6200WIR8

3. Wireless Extinguisher Stopper® with Voice Receiver

Wireless supervision for up to 4 fire extinguishers. Includes a STI 4-Channel Voice Receiver.
STI-V6200WIR4

4. Wireless Extinguisher Stopper®

Wireless alarm unit to monitor the use of fire extinguishers. Requires a STI Receiver to alert to misuse.
STI-6200WIR

5. Mini Theft Stopper®

Protects freestanding or cabinet housed fire extinguishers and other equipment.
STI-6255 - Single Protection
STI-6255-M2 - Double Protection

STI offer a global solution
EN-54 and UL Listed Resettable Call Points

ReSet Call Point
Page 18-19

Global ReSet
Page 22-23

The ReSet Call Point mimics the feel of breaking glass whilst offering the benefits and environmental advantages of a resettable operating element. Suitable for areas that are at high risk of false activations or sensitive to broken glass.

One year on electro-mechanical and electronic components.

Flush Mount
87mm H x 87mm W x 23mm D

Surface Mount
87mm H x 87mm W x 58mm D

CALL POINTS & SWITCHES

ReSet Call Points

DESIGN

An indicator drops into view at the top of the window on activation. The unit is then simply reset with a key and is ready for use.

ELECTRONICS

There are 4 electrical arrangements available; Single Pole Changeover, Double Pole Changeover, Conventional Fire model (470 680Ω) or Sav-Wire 2 Wire Systems.

INSTALLATION

Easy installation due to no glass elements that could be broken or incorrectly fitted. Integral cover and other cover options available.

CONSTRUCTION

Extremely attractive, high value look and feel. Glass appearance maintains operator deterrence, whilst a visible warning flag confirms activation and a key allows units to be quickly reset.

CALL POINTS & SWITCHES

Waterproof Push Buttons

The StopperSwitches are a highly versatile range of attractive waterproof Push Buttons combining unique design, quality and value. The waterproof models are specially designed for use within harsh environments; the push buttons are ideal for indoor/outdoor applications such as oil rigs, ships, factories and wash-down areas.

One year on electromechanical and electronic components.

90mm H x 89mm W x 72mm D

DESIGN
Inset design on the push button helps prevent accidental activations. Standard Function Marking label sheets provided if Custom Label is not specified.

CONSTRUCTION
Moulded in tough UV-stabilised polycarbonate. Space available for function marking or operating instructions.

INSTALLATION
Quick and easy installation. All waterproof models are for surface mount applications.

ELECTRONICS
Low profile, heavy-duty terminations. Wide range of operating voltages up to 250 volts. Key-to-Reset and Momentary models available.

Standard Models

All supplied with Standard Function Marking Labels

The Alert Point is an aesthetically pleasing, robust and fully featured stand-alone, self-contained alarm system. It is available in a variety of colours and can be used for a wide variety of application such as Fire, Intruder and Panic. It provides an effective means of raising an alarm in the event of an emergency.

Ideal for use in industrial, commercial and retail applications as well as portacabins, constructions sites and holiday parks.

Three year guarantee against breakage of polycarbonate in normal use (one year on electro-mechanical and electronic components).

170mm H x 125mm W x 58mm D

CALL POINTS & SWITCHES

Alert Point

DESIGN

Stand-alone alarm system is fitted with an integral resettable call point. An indicator drops into view at the top of the window on activation. The unit is then simply reset with a key and is ready for re-use.

INSTALLATION

Easy installation due to no glass elements that could be broken. No wiring involved and a simple 4 screw fixing making installation quick and easy.

ELECTRONICS

Once activated a 102 dB alarm (at 1 metre) will alert, an activation flag drops in to view and the built in LED facility flashes red. Any external connected devices will be activated.

CONSTRUCTION

Made from tough UV-stabilised polycarbonate which can withstand the severest of knocks.

For further information on
Protective Covers
refer to page 7

Covers for Call Points & Switches

Various sizes, colours & styles for all applications

Why you need a cover...

It is advisable to protect Call Points & Switches with an STI Protective Cover. The covers add an extra measure of protection against vandalism, damage or accidental activations.

How they help reduce unwanted activations...

A cover with optional integral sounder can be highly beneficial; when the cover is lifted, the device will emit a piercing alarm and the culprit will either run or be caught. Environmental covers will protect in weather exposed areas or harsh environmental conditions.

COVERS & CAGES

Look familiar? We've got it covered!

- Steel cages designed to protect a wide variety of devices from vandalism and misuse.
- Constructed from plastic coated, heavy-duty galvanised steel rod.
- Simple 4 fixing point installation can retrofit over existing devices.
- Designed so there is no interference with the operation of the protected device.
- Cages are backed by a three year guarantee against breakage in normal use.

This range of multipurpose, transparent polycarbonate enclosures and metal cabinets are designed for the protection of fire and security control panels and other electronic equipment. Combining a tough, rugged construction with stylish design, the series offers excellent protection for a wide range of equipment.

Three year guarantee against breakage of polycarbonate in normal use (one year on electro-mechanical and electronic components).

Refer to Page 58 for dimensions.

COVERS & CAGES

Environmental Covers & Enclosures (Waterproof/Weatherproof)

DESIGN

Robust enclosures protect control panels located in areas where the environmental conditions are extreme and/or the threat of vandalism or misuse is high.

INSTALLATION

External mounting tabs allow the enclosure to be easily installed on to any wall surface, providing protection without the need to change the location of the equipment. Mounting accessories and tamper-proof screws are provided.

ELECTRONICS

Available with or without a 95 dB alarm, powered by a 9V PP3 battery, to deter unauthorised access to devices.

CONSTRUCTION

Tough UV-stabilised polycarbonate housing can withstand the severest of knocks preventing any vandalism or accidental damage.

These multipurpose, transparent polycarbonate cabinets and enclosures are designed to protect fire and security control panels, electrical units, AED cabinets and various other larger devices. They offer excellent protection from vandalism, accidental damage and the environment whilst ensuring all-round visibility and access.

Three year guarantee against breakage of polycarbonate in normal use (one year on electro-mechanical and electronic components).

Refer to Page 58 for dimensions.

COVERS & CAGES

Polycarbonate Enclosures with Alarms

DESIGN

Robust protective enclosures protect AED's and other equipment located in public areas where there is a history of misuse of equipment.

INSTALLATION

External mounting tabs allow the enclosures to be easily installed on to any wall surface, providing protection without the need to change the location of the equipment. Mounting accessories and tamper-proof screws are provided.

1

ELECTRONICS

For additional security and to deter misuse and theft the enclosures are fitted with a security alarm or sounder/strobe device. Security alarm available with 100 dB flashing beacon.

CONSTRUCTION

Tough UV-stabilised polycarbonate housing can withstand the severest of knocks preventing any vandalism or accidental damage.

These multipurpose polycarbonate enclosures and metal cabinets are available with heater and/or air conditioner facility, and are designed to protect larger sized sensitive equipment, like alarm control panels, from extreme temperatures, vandalism or accidental damage, whilst retaining the desired operating temperatures.

Three year guarantee against breakage of polycarbonate in normal use (one year on electro-mechanical and electronic components).

Refer to Page 58 for dimensions.

COVERS & CAGES

Environmental Enclosures with Heater & Aircon

DESIGN

The Air Conditioner unit is externally mounted to minimise space intrusion in the cabinet.

INSTALLATION

Enclosures mount to the wall enabling the unit to be protected in its designated location. Control panel mounting backplate is included.

1

ELECTRONICS

Heater unit has a low ambient operation package to help prevent it from freezing, and the aircon unit fan runs continuously to sustain a uniform temperature inside the enclosure.

CONSTRUCTION

Metal cabinets have a durable finish to help protect against corrosion. Enclosures are constructed from tough, UV-stabilised polycarbonate. All models protect against vandalism or accidental damage, as well as dirt, dust and grime.

Shallow enclosed back box for 7510/7511HTR available, visit www.sti-emea.com

2

4 & 5

3

6

These polycarbonate enclosures and metal cabinets with built-in heater and air conditioner facility (models also available with air conditioner only) are designed to house larger sized sensitive equipment against vandalism, damage, dirt and grime. By maintaining a temperature above freezing, devices are able to be installed outdoors or in below freezing environments and still remain operable.

These tough covers have been designed to protect card readers, access control keypads and similar devices from abuse and accidental damage as well as from the external elements. All covers are moulded from tough polycarbonate material that is UV-stabilised against discolouration.

Three year guarantee against breakage of polycarbonate in normal use.

Refer to Page 58 for dimensions.

COVERS & CAGES

Biometric & Keypad Covers

DESIGN

Covers designed to protect access and keypad control panels from vandalism and accidental damage as well as the elements.

INSTALLATION

Quick and easy to install. Covers can be retrofitted over an existing device allowing it to maintain its current location.

OPTIONS

Certain models are available in a smoke finish for further security. Gasket replacement is recommended at least every five years.

CONSTRUCTION

Covers are moulded from tough, UV-stabilised polycarbonate. Models fitted with stainless steel torsion spring allows the cover to maintain in a closed position.

2

The Thermostat Protectors are recommended for areas where abuse or tampering of thermostats is a problem. Holes in the frame allow air to circulate freely for proper operation of the thermostat but an interior wall prevents any tampering to the controls with a small object.

Three year guarantee against breakage of polycarbonate in normal use.

COVERS & CAGES

Thermostat Protectors

DESIGN

These tough, locking covers help prevent vandalism, damage and tampering of thermostats or energy sensors. Tamper resistance double wall design allows airflow to the protected device.

INSTALLATION

Quick and easy to install. Covers can be retrofitted over an existing device allowing it to maintain its current location.

OPTIONS

Certain models are available in a smoke finish. Models are available with locks, ideal where thermostats are located in public areas.

CONSTRUCTION

Covers are moulded from tough, UV-stabilised polycarbonate.

2

3

4

5

Tough, clear covers designed to protect thermostats. Recommended for use in areas where abuse or tampering is a problem. These units have the option of a key lock facility to prevent unauthorised tampering; especially useful when the units are located in public areas.

Designed to protect beacons, sounders and other devices from vandalism and misuse. Constructed from plastic coated, heavy-duty galvanised steel rod, the cages can withstand the severest of abuse from vandalism or accidental damage.

1. STI-9617

150mm x 150mm x 125mm

2. STI-9614

200mm x 200mm x 150mm

3. STI-9615

95mm x 95mm x 90mm

4. STI-9664

STI-9664
STI-9664-SS - Stainless Steel
98mm x 98mm x 173mm
STI-9665
178mm x 178mm x 214mm

5. STI-9631

STI-9631
270mm x 270mm x 152mm
STI-9632
420mm x 420mm x 152mm
STI-9633
508mm x 508mm x 152mm

These protective steel cages for external/internal lighting and CCTV cameras offer protection against vandalism, misuse or accidental damage. These cages will help reduce replacement of light bulbs or expensive cameras.

Cages are backed by a three year guarantee against breakage in normal use.

Refer to Page 58 for dimensions.

COVERS & CAGES

External/Internal Lighting & CCTV Cages

DESIGN

These steel cages are designed to protect CCTV cameras and external lighting from vandalism and misuse.

INSTALLATION

Quick and easy to install. Cages can be retrofitted over an existing device allowing it to maintain its current location.

Monitor your building from one convenient location

- Wirelessly monitor key areas of your building with the Wireless Alert Series.
- The Wireless Exit Stopper® will alert you to any authorised or unauthorised use of emergency exit doors.
- Emits a piercing 95/105 dB alarm when a protected door is opened and sends a wireless signal to a STI receiver.
- Sensors have supervised battery and signal reception.

The Wireless Alert Series wirelessly monitors numerous STI devices from one single convenient location. When the receivers detect a tripped site, an audible, visual or voice programmable message will alert which transmitter has been activated.

Three year guarantee against breakage of polycarbonate in normal use (one year on electromechanical and electronic components).

Refer to Page 62 for dimensions.

WIRELESS PRODUCTS

Residential & Commercial Wireless Alert Series

DESIGN

Specially designed to protect and monitor all areas of a building. The receivers have a compact design making them easy to either mount on a wall or place on a desk.

INSTALLATION

No difficult wiring involved. 4-Channel Voice Receiver has easy programming voice prompt and recognises the transmitter. Sensors mount easily in desired location.

ELECTRONICS

When motion or use is detected, the sensor sends a wireless signal to an indoor STI receiver. It has a supervised battery and signal reception.

CONSTRUCTION

Latching and auto-restore mode of operation. 433 MHz wireless frequency.

TRANSMITTING DEVICE

RECEIVERS

1. Wireless Doorbell Button Alert
Supplied with 4-Channel Voice Receiver, alerts when doorbell button is pressed.
STI-V34600 (includes STI-34601)

2. Wireless Extinguisher Stopper®
Wirelessly monitor and prevent misuse of fire extinguishers.
STI-6200WIR
STI-V6200WIR4 - with 4-Channel Voice Receiver
STI-6200WIR8 - with 8-Channel Receiver

3. Universal Alert Sensor
Alerts when monitored site is tripped.
STI-34401

4. Wireless Exit Stopper®
Wirelessly monitor the use of emergency exit doors.
STI-6400WIR
STI-V6400WIR4 - with 4-Channel Voice Receiver
STI-6400WIR8 - with 8-Channel Receiver

5. 8-Channel Receiver
Receiver can monitor up to 8 wireless STI devices from one convenient location.
STI-34108

6. 4-Channel Voice Receiver
Receiver can monitor up to 4 wireless STI devices from one convenient location. Sounds selectable tones or voice messages.
STI-V34104

7. Single Channel Slave Receiver
Receiver works in conjunction with a burglar alarm or control panel. When the monitored site is tripped, a wireless signal is sent to the control panel, efficiently alerting of use.
STI-34098

TESTIMONIALS

What are people saying about STI products?

“Having fitted the **Extinguisher Stoppers** we no longer have equipment being stolen over holidays, weekends and nights. Anybody wanting to protect extinguishers will certainly find value for money by using the Extinguisher Stopper.”
More information on page 14.
Alan Patmore - Fire & Safety Officer
The Luton and Dunstable Hospital

“We found the **ReSet Call Point** very easy to install & very reliable. Our customers find the call points to be very easy to use; we have also noticed that the sites that have these call points no longer call for help due to test keys jammed or glasses dislodges or broken.”
More information on page 18.
Derek Fay - Alarm Manager
Churches Fire Security Ltd

“The residents at the home were continuously leaving the emergency exit doors open. Since the **Exit Stoppers** were installed, it has proved very successful deterring the residents from misusing the Emergency Exits. It has also given the staff piece of mind especially during the night shift.”
More information on page 12.
Mrs Pawar - The Island Residential Home

“We had an intermittent problem with pupils activating the break glass call points in our automatic fire system. Each alarm led to attendance by the local fire brigade. Since Derbyshire County Council Technical Department installed the **Stoppers**, not a single false fire alarm has been recorded.”
More information on page 6.
Sue Kettle - Buxton Community School

“As an installation and maintenance company looking after clients’ air conditioning, we have installed many of the **Thermostat Covers**. These covers help reduce nuisance calls when staff have inadvertently set the operating mode incorrectly.”
More information on page 44.
Les Sweeting - Airtech UK Ltd

“We purchased the **AED Protective Cabinet** to protect Public Access Defibrillators located in Warsaw Airport. The strobe/alarm facility activates the moment the cabinet is opened drawing immediate attention. This helps prevent accidental and unwanted usage.”
More information on page 38.
Rafal Brzyski - Director of Operations
Paramedica Polska Sp. z o.o.
